

Application: Case Sealing
Industry: Industrial/Chemical
Customer Details: Caulk Manufacturer, SIC 2891

PRODUCT IDENTIFICATION NETWORK

Marking, Coding & Labeling Solutions

Problem:

This client was taking packed cases of tubes of caulk and manually closing them, then feeding them into an older model semi-automatic case sealer. The process was labor intensive and slow.

Solution:

PIN Distributor, **Ship-Pac**, upgraded the customer to a new automatic case sealer. Ship-Pac was able to remove the need to close the case after it is automatically packed, eliminating the need for an operator on this line.

Key Benefits:

The customer experienced significant cost savings because there was no need for the operator to close these cases before they are fed into the case sealer. They were also able to increase their production levels on this line.

...and that's a PIN=WIN!
