NEW! SW200 Standard Wax

Economical choice for standard applications

Featuring ... 

IIMAK's new SW200 wax thermal transfer ribbon delivers dependable quality and consistent performance. SW200 ribbons feature IIMAK's proprietary Clean Start® built-in printhead cleaner, which will prolong the life of your printhead. These thermal transfer ribbons are made in the USA and are the perfect solution for handling basic applications with ease.

The SW200 offers many features including:

- Remarkable blackness in print quality
- Prints at low energy setting to reduce stress on the printhead
- Print speeds up to 10ips
- Excellent print quality on flood coated labels
- Good stock latitude from rough to smooth coated papers.

All SW200 ribbons include the Clean Start® feature at no extra cost. With the Clean Start® printhead cleaner build into your ribbon you will find your printhead life prolonged and the equipment will run faster and be easier to use. Clean Start® also minimizes costly downtime.
